

25kW Standard Distribution Box

Overview

The equipment is designed for safe operation and conforms to the NEC for outdoor use. Input: The 25kW PDP has one 60-amp, 4-pole, 5-wire connector. Output: The PDP25 has one. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. The range of applications extends from pure energy distribution in buildings to building automation and through to industrial plants. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Portable power to ECUs. The Larson Electronics MPD-MM3-92L. Connecting (3) Kits together will provide for a Ring Bus Microgrid for up to six generators.
