

800A Standard Distribution Box

AI Overview

An 800A standard distribution box is a high-capacity electrical panel or portable power distribution unit designed to safely manage up to 800 amps of three-phase power. Overview An 800A distribution box can take the form of either a modular switchboard like the MAS800 series or a portable sequential Powerlock box. These units are designed for industrial, commercial, or temporary power applications, providing safe and organized power distribution for high-current systems. MAS800 Modular Switchboards Current Rating: Up to 800A, suitable for tertiary and industrial sectors. Structure: Modular or monobloc cabinets with 250 mm depth, allowing flexible internal busbar arrangements. Circuit Protection: Compatible with Btdin and Megatiker circuit breakers up to 800A. Wiring Systems: Supports Easy Tifast 125, Easy Tifast 250/400, and Tifast Pettini rapid wiring systems for safe and efficient connections. Protection Degree: Maximum IP43, with options to increase protection by installing different doors and panels. Materials and Locking: Front panels available in sheet metal with screw or hinge options for secure access. Applications: Ideal for permanent installations in industrial plants, commercial buildings, and data centers. Powersafe Powerlock Sequential Boxes Current Rating: 800A maximum, three-phase power distribution. Safety Features: Sequential mating system ensures circuits are connected first and disconnected last (first mate, last break), with keyed ports to prevent connection errors. Protection: IP67 rating with lid, suitable for outdoor or temporary installations. Connectivity: Supports standard Powersafe connectors, M12 cable lugs, and color-coded ports for international wiring standards. Variants: Available in 4-port (no neutral) or 5-port configurations, with source and drain versions. Applications: Temporary power setups for events, hospitals, stadiums, mobile generators, field camps, welding equipment, and dockside power. Key Considerations Installation: MAS800 units are typically fixed installations, while Pow...
