

Application of Morocco s Micro-Module Data Center

Overview

Morocco's data center market, valued at USD 27 million in 2022, is significantly underdeveloped compared to its GDP of USD 134 billion. This project will enhance local data storage capabilities, reduce reliance on foreign-hosted data, and support Morocco's Digital 2030 strategy. These data centers are telecom operator-neutral, ensuring businesses have complete flexibility in choosing their connectivity service. The Morocco micro mobile data center market is experiencing rapid growth due to increasing demand for compact, portable data solutions. Key private projects by Iozera, Naver, and Cassava Technologies aim to establish large data centers in Morocco to tap into. The project aims to position Morocco as a global AI-driven economic hub.
