

Bus grounding connector price

AI Overview

Bus grounding connectors typically range from \$10 to \$150 or more, depending on size, material, and brand. Price Overview The cost of a bus grounding connector varies widely based on dimensions, material (copper or aluminum), current rating, and manufacturer. Small grounding busbars or strips for light-duty applications can start around \$10–\$20, while larger industrial-grade connectors for high-current systems may cost \$50–\$150 or more. Specialty connectors from brands like ABB, Eaton, or Marincor may be priced at the higher end due to enhanced durability and compliance with safety standards. Where to Check Prices RS Components: Offers a wide range of bus bar connectors and grounding products with filtering by current rating, material, and mounting style. Prices vary by product and specifications. Amazon: Lists grounding busbars from small business brands; prices depend on size, color, and seller. McMaster-Carr: Provides grounding buses and blocks, often with same-day delivery; pricing is available on the product page. Grainger: Stocks grounding strips, busbars, and kits; prices are updated in real-time and may require account login to view. Graybar: Offers copper grounding busbars; exact pricing requires entering your ZIP code to see local availability and cost. Tips for Purchasing Determine the required current rating and material before comparing prices. Check supplier shipping and delivery options, as industrial connectors may have additional costs. Consider bulk purchases if multiple connectors are needed, as some suppliers offer discounts for larger quantities. Verify compliance with UL or other safety standards for grounding applications to ensure reliability and safety. By reviewing these suppliers and specifying your requirements, you can find a grounding busbar or connector that fits both your technical needs and budget.
