

Cable tray branch with fixing bracket

AI Overview

A cable tray branch with a fixing bracket allows secure support and directional changes in cable management systems, using wall-mounted, ceiling-mounted, or stand-off brackets for stability and proper alignment.

Types of Fixing Brackets for Cable Tray Branches

- 1. Stand-Off Brackets** Stand-off brackets are used to mount cable trays or baskets at a specific distance from walls or surfaces. They provide clearance for airflow, maintenance, and cable routing. Sizes typically range from 50mm to 300mm, and they are made from pre-galvanized or hot-dipped galvanized steel for durability and corrosion resistance.
- 2. G Hanger Support Brackets** G hanger brackets are designed for overhead support of cable trays, trunking, or baskets. They are available in sizes such as 100mm, 150mm, and 225mm, and are constructed from 2mm thick pre-galvanized steel. These brackets allow secure suspension from ceilings or structural beams, ideal for heavy-duty cable loads.
- 3. Trapeze Support Brackets** Trapeze brackets provide robust support for cable trays with various widths and drop lengths. They are often pre-assembled for quick installation and can accommodate multiple cable tray sizes. These are suitable for long horizontal runs or branching points where additional stability is required.

Mounting Options

- Wall-Mounted Brackets:** Secure the cable tray directly to walls, preventing sagging and allowing tidy routing along vertical surfaces.
- Ceiling-Mounted Supports:** Suspend trays from ceilings using rods or hangers, ideal for open spaces or industrial areas where floor space is limited.
- Surface-Mounted Fixing:** Attach trays to floors or platforms using brackets or clips, suitable for heavy-duty or low-level installations.

Accessories for Branching

To create a branch in a cable tray system, additional accessories may be used:

- Tees and Crosses:** Allow directional changes and branching of cable trays.
- Couplers and Clamps:** Securely join tray sections and maintain alignment.
- Mounting Clamps and Tray Hangers:** Provide extra support at branch points.
