

Cable tray cold bending machine

Overview

This cable tray cold bending forming machine is part of a production line consisting of an automatic feeding machine, an automatic punching machine, and the cold bending forming machine itself. The cable trays manufactured by this machine can be used for cable laying. As a professional cold roll forming machine manufacturer, we specialize in supplying advanced equipment for metal cable tray production. Among our core products, the cable tray bending machine plays a crucial role in shaping high-precision cable tray components used in industrial and commercial. This stamping forming unit can roll ordinary cable trays with a maximum thickness of 2. After a month of repeated communication with the Brazilian client, the design and technical parameters were finalized, and manufacturing was completed in two months.
