

Cable tray fixing clamp model

AI Overview

Cable tray fixing clamps come in various models designed for secure, heavy-duty, and versatile installation of cable trays across industrial and commercial settings.

Types of Cable Tray Clamps

- 1. Hold-Down Clamps:** These clamps secure cables directly to the tray surface. For example, MP Husky's GBM high copper alloy clamps hold a single cable and feature copper alloy bodies with durium bolts, nuts, and washers. They are suitable for grounding and heavy-duty applications, including fastening trays to C-Channels and beams without drilling, reducing installation labor costs.
- 2. C-Clamps:** Used for supporting hanger rods on I-beams, wide flange beams, or angles. These clamps are typically made of unfinished iron and can handle loads up to 400 lbs. Wide-flanged versions accommodate beams 6"-12" wide and up to 3/4" thick, with or without hook bolts.
- 3. Channel Clamps:** Designed for American Standard channels with flange widths up to 3-1/4". They are usually zinc-plated steel and may include swivel joints, supporting loads up to 500 lbs.
- 4. Mesh Tray Clamps:** nVent HOFFMAN offers zinc-plated steel kits for mesh cable trays (CTN), providing quick, heavy-duty fixation with included screws. Each kit typically contains 50 clamps for efficient installation.
- 5. Stainless Steel Fixation Clamps:** Trayco provides stainless steel clamps (AISI 300 series) suitable for corrosion-resistant applications. These are ideal for outdoor or humid environments and can withstand extreme cold deformation while maintaining toughness.

Applications and Considerations

Material Selection: Zinc-plated steel for general use, stainless steel for corrosion resistance, and copper alloy for grounding applications.

Load Capacity: Choose clamps based on the weight of the cable tray and cables; heavy-duty clamps can support up to 500 lbs.

Tray Type Compatibility: Ladder, ventilated, or solid-bottom trays may require specific clamp designs to ensure proper support and cable protection.

Installation Efficiency: Some clamps allow attachment without drilling, while others require field...
