

Cable tray rounded corner price

AI Overview

Rounded corner cable tray fittings typically range from \$5 to \$30 per piece, depending on material, size, and supplier. Price Overview The cost of rounded corner cable trays or fittings varies based on material, dimensions, and type: Hot-dip galvanized steel fittings for ladder-type cable trays generally cost \$10–\$25 per piece for standard sizes (2.4 meters length for straight trays, corners priced individually). PVC or plastic quarter-round cable trunking for smaller installations, such as D-Line 22mm x 22mm, is priced around \$5–\$10 per 1-meter length. Stainless steel or specialized corrosion-resistant fittings can be more expensive, often \$20–\$30 per piece, depending on supplier and compliance with standards like DIN EN 61537. Factors Affecting Price Material: Steel (galvanized or stainless) is more expensive than PVC or plastic. Size and radius: Larger trays or tighter bends require more material and precise manufacturing, increasing cost. Supplier and brand: Premium brands like RS PRO, Legrand, or D-Line may charge higher prices but offer better durability and installation features. Quantity: Bulk orders often reduce per-piece cost, especially for industrial or construction projects. Practical Tips For indoor office or light-duty installations, PVC or plastic rounded corners are cost-effective and easy to install. For industrial or outdoor applications, hot-dip galvanized or stainless steel fittings provide durability and compliance with safety standards. Always check compatibility with your existing cable tray system and consider purchasing matching accessories like covers or connectors for a complete installation. By comparing suppliers and materials, you can select a rounded corner cable tray that balances cost, durability, and installation ease.
