

Cable tray type cable tray

AI Overview

The types of cable trays include:

- Ladder Cable Tray:** Features two longitudinal side rails connected by transverse members, resembling a ladder.
- Perforated Cable Tray:** Has holes for ventilation and is lightweight, making it suitable for various applications.
- Solid-Bottom Cable Tray:** Provides a flat base, ideal for high-density cabling and protecting cables from dust and debris.
- Wire Mesh Cable Tray (Basket Tray):** Offers flexibility and is often used for data and communication cables.
- Channel Cable Tray:** A narrow tray that is typically used for smaller cable runs.

These trays are essential for organizing and supporting electrical and communication cables in various installations.
