

Communication optical distribution box angle steel platform

Overview

ODF Optical Distribution Frame, robust steel construction, open frame design for fast and easy access to ODF, 47U fixing positions per 2200mm rack. The ODF is a purpose-made rack designed to accommodate high density Feeder Panels or Splitter Panels used in FTTH PON networks. CommScope offers a variety of easy-to-install frames, racks and cabinets specially engineered for network equipment and fiber cable management. It is designed to serve as a building entry point for FTTH applications but is also a perfect choice for all types of FTTx applications. The fiber splicing, splitting, distribution can be done in this box, and meanwhile it provides solid protection and management for the. TE Platform TE-ODB-4 optical distribution box is used as a termination point for the feeder cable to connect with drop cable in FTTx communication network system.
