

Congo-Brazzaville Network Cabinet Customization Price

AI Overview

Customized network cabinets in Congo-Brazzaville typically range from \$500 to \$3,500 or more, depending on size, configuration, and additional features.

Overview of Network Cabinets Network cabinets, also known as server racks or data cabinets, are used to securely house IT and telecom equipment such as servers, switches, UPS units, and battery systems. They come in various types:

- Floor-standing cabinets (e.g., 18U, 42U, 48U) for data centers or telecom installations
- Wall-mounted cabinets (e.g., 6U, 12U) for smaller setups or branch offices

Customizable cabinets with options for doors (glass, vented, solid), cable management, ventilation fans, and integrated cooling units.

Factors Affecting Price

- Size and Height:** Larger cabinets (42U-48U) cost more than smaller wall-mounted units (6U-12U).
- Load Capacity:** Cabinets designed to hold heavy servers or battery systems (up to 1,500 kg) are more expensive.
- Customization Options:** Adding shelves, UPS integration, ventilation, or lithium battery racks increases cost.
- Material and Finish:** Powder-coated steel, galvanization, or rustproof treatments affect pricing.
- Local Shipping and Import Fees:** Importing cabinets to Congo-Brazzaville may add 15-30% to the base price due to shipping, customs, and taxes.

Typical Price Ranges

- Small wall-mounted cabinets (6U-12U): \$500-\$1,000
- Medium floor-standing cabinets (18U-24U): \$1,000-\$2,000
- Large data center cabinets (42U-48U) with full customization: \$2,500-\$3,500+

Recommendations for Congo-Brazzaville Contact local distributors or regional suppliers for custom quotes, as shipping and import duties can significantly affect final cost. Consider pre-configured cabinets with standard 19-inch racks for telecom or 4G/5G base stations, which are widely used in Congo-Brazzaville. Evaluate accessories and cooling requirements to ensure long-term reliability, especially in hi...
