

Core switch always restarts automatically

Overview

Check for Updates: Ensure your laptop's operating system and drivers are up-to-date by going to Settings > Update & Security > Windows Update and checking for updates. Scan for Malware: Use a reliable antivirus program to scan your laptop for malware or viruses that may cause. Windows automatic restarts can happen for various reasons, like installing operating system updates, driver or BIOS updates, applying system changes, or due to errors. This article will help you identify the causes and. Command line tool: Try to use command line tool to disable memory integrity. Any idea?

01-24-2023 07:50 AM Hi, Most likely, you are encountering a bug in the OS you are running. If the switch is under a service contract, open a ticket with Cisco and they advise what version to upgrade. We have a pair of Dell N3224P-ON switches and today's morning my colleague gave me a task and instructions to remove some unused VLANs. I'm sure I removed the correct VLANs. When I saved the configuration, everything stopped working and now we don't know what to do. I know running the 5 switches is not ideal, but running new cabling probably will not be approved. PLEASE help me!!However, some users have noticed a peculiar issue where Memory Integrity turns on automatically after a restart in Windows 11 even after they had disabled it.
