

Direct supply of ladder-type cable trays

AI Overview

Ladder-type cable trays are typically supplied as prefabricated sections, ready for direct installation, often in standard lengths of 3 or 6 meters. Prefabrication and Materials Ladder-type cable trays, also called cable tray ladders, consist of two longitudinal side rails connected by transverse rungs, forming an open ladder-like structure. They are commonly made from galvanized steel, aluminum, stainless steel, or fiberglass-reinforced plastic for industrial applications, providing strength, durability, and corrosion resistance (Enduro Composites, Inc.). Fiberglass trays may include UV inhibitors and fire-retardant additives to meet Class 1 flame spread ratings. Steel trays often feature tubular or perforated rungs for mechanical support and strain relief. Standard Supply and Installation These trays are supplied in prefabricated sections, typically 3-meter or 6-meter lengths, allowing for modular assembly and easy handling on site. Prefabrication ensures consistent quality, structural integrity, and compliance with standards such as BS EN 61537 for cable ladder systems. The open design allows cables to enter or exit at any rung, facilitates ventilation, and simplifies inspection and maintenance. Ladder trays are designed to support heavy-duty power, instrumentation, and telecommunication cables over long spans, and they can be mounted on floors, walls, ceilings, or equipment racks. Accessories and Flexibility Ladder-type trays are compatible with elbows, tees, crosses, and risers, enabling changes in direction or elevation without cutting the tray. Optional protective covers can shield cables from UV exposure, snow, ice, or vandalism, enhancing cable longevity. Bundling and proper support are recommended to maintain load balance and prevent deflection beyond manufacturer limits. Summary In practice, ladder-type cable trays are delivered as ready-to-install, prefabricated units, designed for heavy-duty cable support, excellent ventilation, and modular assembly. Their materials, lengths, and accessories are selected based on...
