

Distribution Box KPU

Overview

KUPO's power distribution box is made from PA reinforced insulation plastic material, offering excellent properties like thermal insulation, impact resistance, and flame retardancy. The elongated bracket structure makes it easy to hang the box on a TRUSS using hooks. Ready to use DBs- neutral bar/s with shroud/s | earth bar/s | sticking saddles cement spill protector | cable ties | blanking plates and circuit identification lables. Available in moulded type 3P configuration with incomer busbar rating of 250 & 400A with outgoing switching quantity of. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. The maximum input voltage is 13.8v 8 Way Power Distribution Unit MAX 15A The K-PO KDC-3 is a high quality DC-DC junction box with 8 connection points. KPU sensors are available with vapor charge or with adsorption charge. The Thermostats with adsorption charge are widely used to. KPU 6B are fail safe switches for high pressure refrigerants. * 610psig - MWP for products used according to 2014/68/EU PED directive.
