

## Distribution box metal or plastic

### Overview

You can find distribution boxes made from various distribution box materials such as steel, aluminum, PVC, polycarbonate, high-density polyethylene, and thermoset plastics like SMC. Each distribution box material has its own special strengths. Let's simplify the decision-making process. This heavy-duty cabinet secures components like MCB s, RCBO s, SPD s, and live copper busbars. The enclosure serves a critical dual purpose in every modern power network globally. Choosing between a Sheet Steel Enclosure and a Plastic (ABS) Enclosure depends on the installation environment, mechanical requirements, and specific. When it comes to electrical infrastructure, Distribution Boxes are the unsung heroes that house, protect, and organize electrical connections. For example, you may need flame retardant features.
