

Does the optical-to-electrical converter module support 100Mbps and 1Gbps speeds

Overview

The media converter supports one dual speed Small Form Factor (SFP) hot-pluggable slot, auto-sense with 100Mbps or 1Gbps SFP transceivers. Its high reliability is useful for interconnecting broadband data networks. Support 10/100/1000Base-T: Cat5 UTP/STP. Max 100m. The Comnet CNFE2MC is a single-channel, 100 Mbps media converter with one SFP port and one RJ-45 copper port. Discover related ComNet products that work. Stable long-distance communication Gigabit optical converter 100Mbps to 100Mbps, 1Gbps to 1Gbps SFP 2 Slots, Multi/Single mode Converter Converter required for optical and UTP cable connections for wide bandwidth, long-distance transmission, and stable transmission on the Giga Ethernet network. This 10/100/1000. The ComNet CNMCSFP electrical-to-optical Ethernet media converters accept a 10/100 or 1000 Mbps electrical input and converts this to a 100 or 1000 Mbps optical output (selected by a dip switch) and the 100/1000 Mbps optical input back to the 10/100/1000 Mbps electrical output. "Auto-Negotiating" is supported.
