

Eight-core optical cable splicing tray

Overview

It integrates fiber splicing, splitting, distribution, storage and cable connection in one solid protection box. 2 inputs use multi-fiber cable or uncut cable, 8 outputs for FTTH, convenient fast to operate. These trays are essential for maintaining signal integrity, minimizing signal loss, and ensuring long-term reliability in both indoor and outdoor. Discover CommScope fiber splice trays, fiber optic splice trays, and a convenient fiber splice organizer. Organize fiber connections with ease! Ideal for FTTx projects requiring centralized fiber management, including splicing, patching, and integration of cassette splitters. Suitable for both indoor (telecom rooms, basements) and outdoor (exterior walls, utility poles) installations, protected against dust and water per IP55 standards. BD-FTB-08R fiber optic splice closure is able to hold up to 8 subscribers.
