

Energy Storage Meter Distribution Box

Overview

The metering distribution box is a modern distribution equipment integrating electric energy metering, distribution and control, which is specially designed for accurate management of power consumption and power safety. The insulated, encapsulated housings for the meter distribution box are easy to install. Robust electrical meter boxes engineered for utility metering, sub-metering, and revenue-grade installations — available in stainless steel, mild steel, and fiberglass with NEMA 4X and IP66 ratings as standard options. Its core function is to accurately measure the power consumption of each. ABB's Control Room offering includes a comprehensive range of solutions designed to optimize the operator workspace for critical 24/7 processes across various industries.
