

FC interface fiber optic patch cord price

AI Overview

FC fiber optic patch cords typically cost between \$10 and \$50 per unit, depending on length, quality, and connector type. Typical Price Range The cost of an FC fiber optic patch cord varies based on several factors:

- Length:** Shorter cords (1–3 meters) are generally less expensive, while longer cords (5–10 meters or more) cost more.
- Connector Type:** Standard FC/UPC connectors are usually cheaper, while FC/APC connectors, which reduce back reflections, are priced higher.
- Fiber Type:** Single-mode fibers are slightly more expensive than multimode fibers due to higher precision requirements.
- Quality and Testing:** High-quality cords with individual optical testing reports, low insertion loss, and high return loss can increase the price. For example, retail prices for a 1–2 meter single-mode FC/UPC patch cord typically range from \$10 to \$25, while FC/APC versions or longer lengths can cost \$30 to \$50 or more. Bulk orders may reduce the per-unit cost, especially for OEM or ODM purchases, though setup fees for custom labeling may apply.
- Additional Considerations**
 - Protective Packaging:** Many suppliers provide individually packed cords with protective caps, which can slightly increase cost.
 - Regional Variations:** Prices may vary by region due to shipping, compliance with local standards, and market demand.
 - Special Features:** Low-smoke zero-halogen (LSZH) jackets, plenum-rated cables, or specialty fibers (PM, 10G) can further increase the price.

In summary, when budgeting for FC fiber optic patch cords, expect \$10–\$50 per cord for standard lengths and quality, with higher prices for specialized connectors, longer lengths, or premium testing and certifications.
