

Fiji AOC Active Optical Cable OSFP

Overview

The 400G OSFP to 2x 200G QSFP56 breakout AOC is an 4-channel, full-duplex, pluggable active optical cable. It is high-performance, ideal for short-range multi-lane data communication and interconnect applications, offering a low-cost, high-density solution for system providers. Our active optical cable assembly portfolio provides improved cable flexibility and longer reach as compared to both traditional passive copper and emerging active copper (ACC/AEC) solutions, supporting high performance computing, data center and networking interconnect applications. TE. ACON OPTICS offers a full range of high-performance Active Optical Cables (AOCs) including 800G, 400G, 200G, and 100G solutions, purpose-built for AI, cloud, and next-generation data center environments. Forward error correction (FEC) is required to be implemented by the host in order to ensure reliable system operation. They are compliant with the OSFP MSA, IEEE802. Recommended. Active Optical Cables combine fiber-optic reach with the simplicity of a permanently attached transceiver.
