

Haiti Single-Fiber Bidirectional 10G

Overview

This high-performance bidirectional SFP+ transceiver delivers 10Gbps connectivity over 70km single-mode fiber using 1490nm/1550nm wavelength division multiplexing (WDM) technology. Simplex LC interface, hot-pluggable design, and integrated Digital Diagnostics Monitoring (DDM/DOM), it provides real-time performance tracking for critical infrastructure. FS offers a comprehensive range of 10G BiDi modules tailored for diverse scenarios. By using bidirectional (BiDi) wavelength division, these modules send and receive. BiDi transceiver, a compact optical transceiver with WDM (wavelength division multiplexing) technology and SFP multi-source protocol (MSA) compliance, allows fast data transmission using a single fiber optic for both sending and receiving signals, saving resources and cutting infrastructure costs.
