

How many sides does a 288-core optical distribution box have

Overview

This RM-288 patch panel has two sections for fiber optic cable entry and exit. It can be pre-configured with up to 24 MTP-LC cassettes, up to 288 pass-through LC, SC, ST, or FC ports, and up to 144 fiber splicing capacity. A very suitable solution for spliced GPON networks. The OHC 288 houses 48 feed/pass-thru adapters and 288 distribution adapters for fiber distribution to high density buildings with many potential subscribers. This rack-mounted patch panel includes cable management accessories.

- **Compact Design:** The mini ODF (Optical Distribution Frame) is designed to be compact and wall-mountable, saving space and allowing for easy installation in various locations.
- **High Fiber Capacity:** With a capacity of 288 fibers, the ODF can accommodate a large number of fiber connections, making. This splice closure is widely used in FTTH outdoor harsh environment, so each port with blocks, rubber seal or grommets, all good seal performance IP68 protection level, good choice for underwater. To ensure it meets your exact requirements, orders are handled through direct contact. Please contact us to: Our team will assist you promptly.
