

How much does a PVC-coated cable tray cost

AI Overview

PVC coated cable trays typically range from \$20 to \$50 per meter, depending on material, size, coating, and order quantity. PVC coated cable trays are corrosion-resistant solutions designed for industrial, commercial, and infrastructure environments, offering protection against moisture, chemicals, and environmental degradation. They are available in various configurations, including ladder, perforated, slotted, and enclosed channel designs, each suited for specific load capacities, ventilation needs, and installation conditions. Standard lengths are often 3 meters, with widths ranging from 75 mm to 150 mm and depths around 50 mm.

Factors Affecting Price

- Material Type:** Steel is the most common base material, offering high strength and load capacity, while aluminum and stainless steel are more expensive but provide additional corrosion resistance.
- Coating:** PVC coating enhances resistance to moisture, chemicals, and abrasion. Pre-galvanized or powder-coated trays may also affect cost.
- Tray Design:** Ladder trays generally cost more than perforated or channel trays due to higher material usage and load capacity.
- Dimensions:** Wider and deeper trays require more material, increasing the per-meter price.
- Order Quantity:** Bulk orders can reduce costs by 20%–40%.
- Installation and Accessories:** Labour, brackets, fasteners, and covers add to the total cost.
- Location and Shipping:** Costs vary based on delivery distance, site accessibility, and regional labour rates.

Typical Price Range

- Steel PVC coated trays: \$20–\$30 per meter
- Aluminum PVC coated trays: \$30–\$50 per meter
- Custom or heavy-duty trays: Prices may exceed \$50 per meter depending on specifications

For an exact quote, it is recommended to provide suppliers with your project details, including tray type, dimensions, quantity, and installation environment. Suppliers like Cablofil, CEF, Leg...
