

How much does a Serbian wire mesh cable tray cost

AI Overview

Wire mesh cable trays in Serbia typically cost between \$2 and \$25 per meter, depending on material, size, and finish. Price Range and Factors

The cost of a wire mesh (basket) cable tray in Serbia varies based on several factors:

- Material:** Galvanized steel is the most common and affordable, while stainless steel (SS304, SS316) and aluminum are more expensive due to corrosion resistance and durability.
- Size:** Widths range from 50mm to 600mm, heights from 50mm to 100mm, and lengths from 1m to 2.5m. Larger trays or custom dimensions increase the price.
- Finish:** Hot-dip galvanized trays are more costly than pre-galvanized ones but offer better protection against rust, especially outdoors. Powder-coated or stainless steel finishes add to the cost.
- Type:** Wire mesh trays are generally cheaper than ladder or perforated trays and are ideal for lightweight cabling. For standard wire mesh trays, prices per meter can start around \$2 for basic pre-galvanized steel and go up to \$25 or more for stainless steel or custom sizes. Bulk orders or project-based purchases often reduce the per-meter cost.

Additional Considerations

- Installation:** Wire mesh trays are lightweight and easy to bend on-site, reducing labor costs.
- Accessories:** Supports, bends, and connectors are sold separately, which can add to the total project cost.
- Durability:** Investing in higher-quality materials like stainless steel can reduce long-term maintenance costs, especially in humid or industrial environments.

In Serbia, suppliers such as Jeetmull Jaichandlall and other local manufacturers provide competitive pricing and can offer bulk discounts for large projects. For precise quotes, contacting suppliers directly with your specifications is recommended.
