

How much does a meter of 300x150 low-voltage cable tray cost

Overview

The average cable tray price per meter ranges from \$2 to \$25, depending on material, type, size, and surface finish. □□ For bulk orders or project pricing, the cost can be significantly lower. The main cost driver is the material used in manufacturing: □□ Galvanized steel is the most common. The majority of individuals will consider the cost of the components. Cable trays will tend to be significantly less expensive to use in 2026 than metal pipes due to their faster installation. That number matters, but it's rarely the one that decides whether a project stays within budget. Constructed with two parallel side rails connected by transverse rungs, ladder trays offer a strong, durable structure ideal for heavy-duty cable installations.
