

# How much does a meter of German mesh cable tray cost

## AI Overview

The cost of German mesh cable trays typically ranges from \$800 to \$2,500 per ton, or \$2 to \$25 per meter, depending on material, coating, and installation factors.

**Material and Manufacturing Costs** Wire mesh cable trays are made from steel wire welded into a tray structure. The raw material cost is a major factor, with prices ranging from \$800 to \$2,500 per ton in 2025, depending on wire gauge, surface coating, and supplier location . Common materials include:

- Pre-Galvanized Steel (PG):** Affordable, suitable for dry indoor areas .
- Hot-Dip Galvanized Steel (HDG):** More expensive, ideal for outdoor or industrial environments due to corrosion resistance .
- Aluminum:** Lightweight and rust-proof, higher upfront cost but reduces support structure requirements .
- Stainless Steel:** Highest cost, used in hygienic or corrosive environments like food plants or coastal areas .

**Cost Per Meter** For practical budgeting, mesh cable trays are often priced per meter, ranging from \$2 to \$25, influenced by material, size, and surface finish . Bulk orders or large projects can reduce the per-meter cost. Wire mesh trays are generally cheaper than ladder or perforated trays and are easier to install, which can save labor costs .

**Installation and Total Project Costs** The total cost includes not only the tray itself but also installation, fittings, supports, and labor. Wire mesh trays are lightweight and flexible, which reduces installation time and labor expenses compared to heavier tray types . In some projects, using cable trays instead of conduit piping can save 40–60% of the overall budget due to easier handling and faster installation .

**German Suppliers** Germany has multiple suppliers of mesh cable trays, and prices may vary based on local manufacturing, certifications, and delivery logistics. IndustryStock lists 16 suppliers from Germany, as well as options from China and Denmark, which can provide com...
