

How much does galvanized cable tray cost in South Sudan

AI Overview

Galvanized cable trays are available in South Sudan, but prices vary by size, specification, and supplier, and are typically obtained via direct quote. Galvanized cable trays, which are steel trays coated with zinc to resist rust and corrosion, are widely used for organizing and protecting electrical cables in industrial, commercial, and residential projects. In South Sudan, suppliers such as Shopit offer products like the 50mm x 25mm galvanized cable tray, emphasizing speedy delivery and reliable service. Other suppliers, including Brilltech Engineers, provide a range of galvanized cable trays with different specifications and custom solutions. Factors affecting price include: Tray dimensions (width, depth, and length) Material thickness and quality of steel Perforation type (solid, perforated, or ladder style) Quantity ordered Delivery and shipping costs. Since prices are not listed publicly, the most accurate way to determine the cost is to contact suppliers directly for a quote. Suppliers typically provide pricing based on your project requirements, including size, quantity, and delivery location. For example, Shopit and Brilltech Engineers both encourage customers to request quotes to get precise pricing. Recommendation: Reach out to multiple suppliers in South Sudan to compare prices and delivery options. Ensure that the galvanized trays meet your project's durability and corrosion-resistance requirements, especially in harsh environmental conditions.
