

## Huawei 9306 optical module price

### AI Overview

Huawei 9306 optical modules typically range from \$500 to \$1,500 depending on type, condition, and vendor. Huawei 9306 optical modules, such as the LE0MG24SA 24-port Gigabit optical interface board, are compatible with S9303, S9306, and S9312 switches and are available in both refurbished and new conditions. Refurbished modules are often priced lower, generally starting around \$500–\$800, while brand-new modules can cost \$1,000–\$1,500 or more, depending on the supplier and shipping options. Availability and Vendors Authorized distributors and specialized resellers like cmicomputer and Uonel offer both new and refurbished modules with warranty and technical support. Alibaba and other online marketplaces list modules such as LE0DX12XSA00 for S9306 switches, often with bulk purchase options and international shipping. Pricing can vary based on region, module type (10G, 40G, 100G), and stock availability, so contacting the vendor directly for a quote is recommended. Tips for Purchasing Ensure the module is compatible with your S9306 chassis and firmware version. Verify whether the module is new, refurbished, or used, as this affects both price and warranty. Consider bulk orders if deploying multiple switches, as vendors often provide discounts. Confirm shipping and import costs if purchasing internationally. In summary, while exact prices fluctuate, expect to pay \$500–\$1,500 per Huawei 9306 optical module, with refurbished units on the lower end and new units on the higher end, depending on vendor and specifications.
