

## Huawei fiber optic cable severed

### Overview

On September 6, 2025, several fibre-optic submarine cables in the Red Sea were reportedly severed. This cause widespread internet disruptions. Specialised ships like the 'NKT Victorial' use various tools to find the exact location of the cable cut, retrieve the cable, splice the damaged sections (replacing damaged sections with new cable segments), test and lower back to the seabed. Subsea cable repairs are not an easy fix, according to. On 17-18 November 2024, two submarine telecommunication cables, the BCS East-West Interlink and C-Lion1 fibre-optic cables, were disrupted in the Baltic Sea. The incidents involving both cables occurred in close proximity to each other and near-simultaneously, which prompted accusations from.
