

Huijue 48-core optical cable model

Overview

Overview: The 48 Core GYTY53 Fiber Optic Cable is a robust, fully armored outdoor cable engineered for long-distance transmission and direct burial applications. Fiber Optic Distribution Box HJ-GF-KJW-48B Overview Fiber-optic cable distribution box (FODB) HJ-GF-KJW-48B is a 48-core plastic fiber distribution box, has the functions of fusion and optical distribution. Environmental conditions Company

Introduction: Established in 2001. Indoor Fiber Optic Cables (GJBFJH/GJBFJV) are specifically designed for building interior fiber optic communication. With LSZH (Low Smoke Zero Halogen) jackets producing low smoke and zero halogen during combustion, they meet indoor fire safety regulations. The optical fiber elements are typically individually coated with layers and contained in a protective tube suitable for the environment where the cable will be deployed. It consists of lightning protection and high-speed optical communication capabilities within a single unit. The configuration of 48 fibers OPGW allows for. Huijue Communication Equipment specializes in producing ODN product series, including jumperless optical cross-connect cabinets, optical fiber distribution boxes of various core counts, optical cable joint closures, termination boxes, and other optical distribution network equipment.
