

IBM Data Center Modularization

Overview

IBM's Prefabricated Modular Data Center is a compact, vendor-neutral modular data center solution that can be deployed at any location. It has a scalable and flexible design that enables rapid scaling of IT to the customers while reducing construction cost and OPEX. This free-standing structure provides an extra layer of security within an existing IT room. It can also be used as a. Powerful single frame and rack mount systems and new AI and automation software upgrades for IBM Z and LinuxONE 5 help enterprises deploy workloads with more flexibility ARMONK, N., July 7, 2026 – IBM (NYSE: IBM) today announces new IBM z17 and IBM LinuxONE 5 configurations, marking the first. IBM has introduced rack-mount versions of its z17 mainframe and LinuxONE systems, allowing customers to install core IBM Z components directly into industry-standard 19-inch racks alongside existing infrastructure.
