

Industrial-grade switch specifications

Overview

Glass-reinforced, chemical-resistant thermoplastic back body for durability, strength, and resistance to harsh cleaners. Auto-ground clip assures positive ground. Designed to withstand abuse and constant use in demanding applications, these durable switches virtually eliminate contact bounce and arcing. Exterior housing is made entirely of high-performing chemical- and. One-piece toggle molded from chemical-, impact-, and heat-resistant thermoplastic. When you see the UL, CSA, or cULus symbols, you can. Extreme Industrial Switches are a family of ruggedized Layer 2 switches designed to operate under harsh environments and extended temperature conditions. They provide continuous uptime, manageability, and operational efficiency. With flexible PoE options of IEEE 802. Accepts #14 - #10 AWG copper or copper-clad conductors. Working Voltage - 277V AC Temperature Rise - Max.
