

Instructions for the Suspended Platform Distribution Box

AI Overview

The Suspended Platform Distribution Box must be installed, operated, and maintained according to the manufacturer's manual, ensuring all safety and load specifications are strictly followed.

General Safety Guidelines Before handling the distribution box or any suspended platform component, ensure that all personnel are trained and familiar with the Altrex suspended platform system and comply with local, state, and national safety regulations. Always wear proper fall arrest equipment and gloves when assembling or dismantling the system. Never use damaged or non-original components, and stop operation immediately if any part malfunctions.

Installation and Assembly Positioning: The distribution box should be mounted according to the platform configuration tables provided in the manual, ensuring stability and proper alignment with hoists and stirrups.

Connection: Connect the distribution box to the hoists and power supply as specified by the manufacturer. Ensure all cables are secured and free from damage.

Load Verification: Confirm that the load capacity of the distribution box matches the hoist and platform specifications. Overloading can compromise safety and structural integrity.

Inspection: Before each use, inspect the distribution box for loose connections, wear, or damage. Verify that all switches and emergency stops function correctly.

Operation Only trained personnel should operate the distribution box and associated hoists. Follow the sequence of operations outlined in the manual, including raising and lowering the platform gradually to avoid sudden load shifts. Monitor the platform stability continuously during operation, ensuring that the distribution box is not overloaded and that all hoists respond correctly.

Maintenance Keep the distribution box clean and dry, avoiding exposure to excessive heat or moisture, which can reduce structural strength. Replace any damaged or w...
