

Jumper wire and pigtail processing orders accepted

AI Overview

Jumper wires and pigtails can be custom-processed and ordered from multiple suppliers, with options for automated assembly, connector types, and rapid delivery. Jumper wires, commonly used for prototyping and electrical connections, are widely available from suppliers like DigiKey and Mouser Electronics, offering in-stock inventory, pricing, and same-day shipping options. For custom processing, fully automated wire assembly machines such as the Rittal Wire Terminal WT C can handle length-cutting, stripping, ferrule fitting, labeling, and order-specific bundling for up to 36 different wire types with cross-sections from 0.5 mm² to 6 mm². This allows for high-volume, precise, and repeatable production of jumper wires with minimal manual intervention.

Fiber Optic Pigtails Fiber optic pigtails and jumpers are available from companies like Siemon and SMS Precision Tech, offering factory-tested, high-performance assemblies in a variety of interfaces and configurations. SMS Precision Tech maintains stock to build custom pigtails and cables with connectors such as KTK, Micro-D, Amphenol, Molex, or Lemo, and can deliver most orders within one day. Their pigtails feature high-temperature, color-coded sleeving for easy identification and durability, and all assemblies are quality-tested on automated test systems.

Ordering and Customization Custom Configurations: Both jumper wires and pigtails can be customized for length, connector type, and color coding. Rapid Fulfillment: Suppliers like SMS Precision Tech can fulfill many orders within a single day, while automated wire processing systems enable fast, high-volume production. Quality Assurance: Factory testing ensures accuracy and reliability, particularly for fiber optic pigtails and critical electrical connections. Accessories and Options: Automated systems can include labeling, bundling, and tr...
