

LETT Fiber Optic Cold Connector

Overview

□Fibre Optic Splice□L925BP single core fibre optic quick splice connector. A fiber optic connector is a mechanical device used to align and join optical fibers, enabling light to pass through with minimal loss. Unlike fiber splicing, which is permanent, connectors allow for easy connection and disconnection of cables, making them ideal for maintenance and flexibility in. LEMO specialises in designing and manufacturing high-performance fibre optic connectors that ensure flawless signal integrity and data transmission in the most demanding environments. Our commitment to Swiss engineering excellence guarantees a connectivity solution that you can depend on when. The LC connectors and adaptors set the standard for small optical fibre interconnects. 3dB, Return Loss: >50dB) with A-level tricyclic ceramic core, which can be reused upto 1000 times. □PEI material□ The main body of the connector is made of PEI materials, supports operation temperature. Cold connector is applied to telecommunication network, metropolitan area network, optical fiber communication system, optical fiber test instrument/ appearance, optical fiber CATV, optical fiber sensor, optical broadband access network, FTTH optical fiber access, fiber distribution frame.
