

List of Lighting Distribution Box Switch Models

AI Overview

Lighting distribution boxes come in various models including starter boxes, expansion boxes, and modular switch units with options for on/off or dimmable control.

Starter and Expansion Boxes

Flex7 Starter Lighting Distribution Box: Provides plug-in connection for multiple luminaires controlled by a single switch or control device. Supports simple on/off or dimmable control, with outlets rated 16A 230V. Large input terminals accept 3 x 2.5mm², 2 x 4mm², or 1 x 6mm² conductors. Expansion boxes can be added to increase the number of outlets or control additional luminaire groups.

Flex7 Supply Tap-Off Box: Allows sharing power from a starter box to control a second group of luminaires separately. Can be connected directly unit-to-unit or via a lead.

Modular Switch Units and Distribution Boards

ABB Mini Center Compact Distribution Board: Offers flexibility with a wide choice of incomers including Switch Disconnectors, MCCBs, MCBs, RCCBs, RCDs, or direct cable connections. Supports modular DIN rail components for easy installation and expansion.

Schneider Electric Low-Voltage Distribution Switchboards: Includes tested and compliant switchboards for residential, commercial, and industrial applications. Models vary by number of circuits, amperage, and type of protection devices.

Wieland Smart Distribution Boxes: Designed for decentralized installation, supporting pluggable electronics, energy distribution, and building automation. Compatible with various switch types and communication-enabled systems for smart building applications.

Key Components in Lighting Distribution Boxes

Circuit Breakers (MCB, MCCB): Protect circuits from overloads and short circuits.

Residual Current Circuit Breakers (RCCB): Detect imbalances between phase conductors for enhanced safety.

Isolators: Manually operated switches to safely isolate circuits during maintenance.
