

Low Loss Fiber Optic OTDR Tester in South Africa

AI Overview

High-performance OTDR testers for low-loss fiber measurement are available in South Africa from suppliers like Ceyear, TP 700, NOYAFA, Coral-i Solutions, and Tycom. Recommended OTDR Testers

Ceyear 6418-2103 OTDR: A multifunctional mini OTDR suitable for FTTx networks, capable of measuring fiber length, transmission loss, and splice loss. It features a touch screen, keypad, built-in optical power meter, VFL, and supports both single-mode and multi-mode testing. The device has a large lithium battery for over 8 hours of continuous field operation and allows remote control and data export via USB or SD card.

TP 700 OTDR: Supplied by AGE Technologies, this OTDR offers high-quality optical time-domain reflectometry at an affordable price, suitable for field testing and low-loss fiber verification.

NOYAFA NF-981 OTDR: Available from Cape Instrument Services, this tester provides automatic event mapping, optical power measurement, and insertion loss testing. It is designed for clear visualization of fiber link events and fault locations, making it ideal for low-loss fiber assessment.

Suppliers and Distributors in South Africa

Coral-i Solutions: Offers portable OTDRs, power meters, and visual fault locators, along with training and calibration services. Their portfolio includes multi-wavelength handheld units suitable for FTTx and certification projects.

Tycom (Pty) Ltd: Supplies a variety of handheld OTDRs and combined testers (OTDR, VFL, optical power meter) from brands like Fluke and Megger. They also provide repair and technical support for field instruments.

IC Logistix: Stocks professional-grade OTDRs, B-OTDRs, and accessories such as launch modules and calibrated reference cords, supporting accurate low-loss fiber measurements and network certification.

Southern Elements (ShopFiber): Offers compact and advanced OTDRs with multi-wavelength capability, suitable for single-...
