

Maldives Aggregation Switch 10G

Overview

5G & 10G Switch – The switch is equipped with 4 x 2.5G Ethernet Ports and 2 x 10G SFP+ Slots. 5G/10G speed, and compatible with RJ45 copper. The MES6000 series is a high performance aggregation 10G core/aggregation switch engineered for modern enterprise and education networks that require reliable, flexible, and scalable connectivity. Faster replacement and priority support, covered for 5 years. An aggregation switch is a network device that consolidates traffic from multiple access switches, wireless access points, or other edge devices and forwards it to core switches or routers. By bundling multiple network connections into a single high-bandwidth link, aggregation switches help.
