

Malta OTN Router 40G

Overview

Highly integrated, ultralow- power, quad-port 10G, or a single-port 40G, OTN Framer/Mapper/PHY device. It incorporates OTN mapping/demapping, framing/deframing and forward error correction (FEC) encoding/decoding functions to enable high-density and low-power packet. This data sheet provides detailed product specifications for an important element of the Cisco ® Ethernet Optimized solutions: the Cisco CRS 4-Port 40GE LAN/OTN Interface Module (Figure 1). The module connects directly into any 40 Gigabit Ethernet transport network, including traditional OC-768. Foundry Network's 10GbE NetIron 40G router offers wire-speed, non-blocking performance of up to 1. These IPv4/IPv6 routers provide up to 480 Mp/sec forwarding performance, while also supporting multiple routing protocols including RIP, BGP-4, OSPF, IS-IS and more. MACOM's OTN Framer/Mapper/FEC family products offer complete portfolio of solutions for 10G, 40G and 100G optical transport networks. They are ideal for high-capacity Carrier Ethernet router/switches, Packet Optical Transport systems and DWDM Transport systems. The OTN framer devices integrate high.
