

# Method for 90-degree outward folding of cable tray

## Overview

Creating a 90-degree elbow in an electrical cable tray, often called a "fabricated" or "mitered" bend, involves cutting, bending, and fastening a straight section of tray. The most common method involves creating two 45-degree cuts to form a 90-degree angle. Do you want a hard 90 or 2 spaced out 45° bends?

Need dimension of tray first width x side wall. To remove the lip we can use a small hand grinder (B) or a file. Oglænd System manufacture and deliver Multidiscipline modular bolted support systems, cable trays, cable ladders and accessories for complete installation and containment of Instrument, Electrical, Telecom, HVAC and Piping services. This cutting guideline provides you with the optimal cutting. Elbow joint RVS is pushed inside the cable tray and attached with the included screw set.
