

Moldova 6-core single-mode optical cable price quote

AI Overview

6-core single-mode fiber optic cables in Moldova typically range from \$0.10 to \$2.00 per foot, depending on specifications, construction, and bulk order requirements.

Pricing Overview

The cost of 6-core single-mode fiber optic cables varies based on several factors:

- Cable Type and Construction:** Standard OS2 single-mode fiber with outdoor durability or bend-insensitive design can cost between \$0.10 and \$0.50 per foot for bulk purchases, while armored or pre-terminated cables may reach \$2.00 per foot.
- Installation Environment:** Outdoor aerial or underground-rated cables are more expensive than indoor plenum-rated cables due to additional protective layers and environmental resistance.
- Quantity and Customization:** Large orders or OEM customization (e.g., jacket color, connectors, packaging) can affect pricing. Custom orders may also influence lead time and shipping costs.

Technical Considerations

Before requesting a formal quote, ensure the following specifications are defined:

- Fiber Type:** OS2 single-mode is standard for long-distance transmission, supporting up to 40–100 km without amplification.
- Core Count:** 6-core configuration allows multiple signal pathways for telecom, FTTH, or campus networks.
- Jacket and Rating:** Outdoor-rated, UV-resistant, or armored jackets are recommended for harsh environments.
- Connector Plan and Testing:** Pre-terminated or tested cables may incur additional costs but reduce installation complexity.

Moldovan Market Context

While specific Moldovan supplier quotes are not publicly listed, market reports indicate that single-mode optical fiber cables are available through local distributors and international suppliers. Bulk procurement and B2B orders are common, and delivery times typically depend on order size, customization, and shipping logistics.
