

Narrow-frame distribution box

Overview

Plastic enclosures with a width of 6,2. 15 mm for mounting on DIN rails (according to DIN EN 60715 TH35) allow maximum utilization of the interior space in distribution boxes. Despite the minimal width of the enclosure, they offer a sufficient number of cable connections (up to 26). A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. The OTRANS can provide you with fiber distribution frame, optical junction box, cable distribution box, wall mounted cable distribution box, cable connection box, optical terminal box, optical fiber distribution box, rack splitter box, wall mounted splitter box, optical fiber information box, DINRAIL. Its flexible design and selection of mounting systems provide a convenient, secure, enclosure for installing and distributing broadband and smart home services within residential premises. The low-profile Narrow model lowers the lid depth by 1" (from the standard lid) and utilizes a hinge for a. The xComfort BF range includes a 2 to 5-row multimedia distribution board, which comes with a mounting plate and a transparent door that offers a significantly improved wireless connection compared to standard metal doors. The multimedia distribution board meets all the requirements of IEC/EN 62208. Plastic Electrical Box, also known as a consumer control unit or electricity control unit. JUNON new range: C6 series Single Phase. Distribution Box deliver safety, flexibility and eco friendly.
