

Network cabling and cable management frame

Overview

A cable management rack is designed to route, protect, and organize copper and fiber cables inside network cabinets. Beyond keeping cables tidy, a well-structured cable manager reduces cable stress, improves heat dissipation, and ensures bend-radius compliance for data. CommScope offers a variety of easy-to-install frames, racks and cabinets specially engineered for network equipment and fiber cable management. FlexFusion™ Cabinets XG offer a unique universal platform. It is an all-in-one cable management solution consisting of 24 retractable Cat. Our innovative system enables 10x faster installation & maintenance and thanks to our Patchcatch it also allows up to 50% more space. Our patented and. Effective cable management is essential in any networking space, from closets to data centers, to avoid disarray in cables and wires, aiding cable operators and administrators.
