

New Zealand High-Quality Cable Tray Supports

AI Overview

Cable tray supports in New Zealand are designed to comply with local standards, offering galvanised steel, wire mesh, and modular support systems suitable for commercial, industrial, and infrastructure projects.

Types of Cable Tray Supports

- Steel and Wire Mesh Trays:** Steel & Tube and Legrand provide pre-galvanised steel and wire mesh cable trays that are suitable for indoor and outdoor use, offering corrosion resistance and structural integrity for heavy-duty applications. Wire mesh trays are particularly flexible for routing complex cable layouts.
- Modular Support Systems:** USL Multistrut and Mechanical Support Systems supply modular support channels, brackets, and fixings designed for New Zealand conditions. These systems allow for adjustable mounting heights, easy installation, and integration with seismic bracing where required.
- Galvanised and Powder-Coated Finishes:** Supports are available in pre-galvanised, hot-dip galvanised, or powder-coated finishes, ensuring durability in both indoor and outdoor environments. This is critical for compliance with local building and electrical standards.

Installation and Standards

Compliance

Mounting Options: Supports can be ceiling-mounted, wall-mounted, or floor-supported depending on project requirements. Modular strut systems allow for quick adjustments and on-site modifications.

Load and Span Considerations: Cable tray supports are designed to handle light to medium duty loads, with deflection and span guidelines provided by manufacturers to ensure safety and compliance.

Seismic and Structural Requirements: In New Zealand, seismic considerations are important. Many support systems, such as those from USL Multistrut, are engineered to meet seismic bracing requirements for electrical and mechanical installations.

BIM and CAD Integration: Steel & Tube provides BIM-enabled 2D and 3D CAD details for planning...
