

Norwegian Core Switch Manufacturer

AI Overview

Key Norwegian manufacturers of core and high-voltage switches include MindCore Technologies and The Switch, both specializing in advanced electrical and power distribution solutions. MindCore Technologies is a Norwegian company focused on the design and manufacture of distribution and transmission class disconnect switches up to 800 kV. They emphasize high reliability and long-term performance, with products tested for seismic, ice, and high-voltage conditions. MindCore has over 60 years of experience in switchgear and has expanded production facilities to enhance capacity and efficiency. Their solutions are widely used in utilities and industrial applications, and the company is ISO 9001 certified. The Switch is another prominent Norwegian manufacturer, providing custom electric machines and power electronics for system integrators and OEMs. Their products are applied in marine, renewable energy, and industrial sectors, delivering tens of gigawatts of electricity globally. The company focuses on high-speed solid-rotor induction motors and optimized power electronics, supporting electrification and energy transition initiatives. Core Power Supplier Network According to Volza, Norway has 17 core power suppliers active in global trade, with 7 exporters shipping to international buyers. These suppliers provide a robust network for sourcing core switches and related power equipment, offering transparency in shipment volumes, trade routes, and supplier reliability. Summary For industrial or utility applications requiring high-voltage or core switches, MindCore Technologies and The Switch are leading Norwegian manufacturers. Additionally, the broader Norwegian supplier network provides access to verified core power equipment exporters, ensuring reliable procurement options for global buyers.
