

Optical distribution module ODF24

Overview

ODF 24 Core unit is specially designed for the optical fiber communication equipment room. ODF 24 Core has the function of cable fixation, protecting fiber cable terminating, wiring, distribution, and protection of fiber cores and pigtails. Its box body is made of high quality cold-rolled steel material, and the surface of the product uses smooth electrostatic spraying processing. The system ensures better connection between the devices and reduces energy losses. If you are. ✓ 12 to 144 port configurations for scalable fiber connectivity and management ✓ Includes SC pigtails and couplers for quick plug-and-play installation ✓ Cold-rolled steel housing is durable, rust-resistant, and fits 19-inch racks ✓ Supports high-speed cabling and is compatible with OM1/OM2. Optical Distribution Frame (ODF) 1U, 24 Ports SC Simplex for 24 Fusions 1U Economic Optical Distribution Frame for 24 SC ports or double LC, with 2 joints fasteners and accessories to organize the fibers. Protect and organize your joints and fiber optic connections with the accessories included in. An optical distribution frame (ODF) is a frame used to provide cable interconnections between communication facilities, which can integrate fiber splicing, fiber termination, fiber optic adapters & connectors and cable connections together in a single unit. It can also work as a protective device. 1U Patch Panel tray for 24 SC ports Duplex, including 24 SC/APC adapters Duplex, has 2 trays of 24 splices each and accessories to organize the fibers.
