

PAC Fiber Optic Switch

Overview

We lead the industry in optical switch technology, delivering the lowest insertion loss (0.2 dB), fastest switching speed (10 ns), broadest wavelength range (300–2400 nm), widest fiber compatibility, highest optical power handling (50 W), and space-qualified reliability. Industrial Din Rail Switch Gigabit Ethernet 2Port Industrial SFP Fiber Switch 100M 1SFP Slot +2RJ45 Unmanaged Fiber Optic Switch (PAC-612SFP-FE) resistant design to adapt to the requirements of harsh industrial environments. Artificial control through dip switches, support for ring protection. Fiber-optic switches control light paths within fiber optics, ranging from simple on/off types to complex matrix configurations like 64×64. The simplest device is an on/off switch with one input and one output, which allows. VERSITRON manufactures a wide range of fiber optic switches that provide links for your 10Base, 100Base, 1000Base Gigabit, and 10 Gigabit networks simultaneously. Various port sizes are available ranging from 4 up to 52 ports. Where switches simply block or pass optical signals on individual or multiple channels, multiplexers route multiple channels out to a single fiber optic cable.
