

Panama Micro Module Data Center IP65

Overview

Located in the Corozal area of Panama City, the new Tier III-certified (Design) building offers 5,500 square meters (59,200 sq ft) of space for up to 650 equivalent racks across five modules and 3. I submarine cables landing in Panama. It is built following the most stringent anti-seismic criteria and designed to guarantee the maximum standards of reliability and performance while minimizing its impact on the environment thanks to the adoption of the latest energy-efficient power and cooling. The company this week announced the launch of the Panama Digital Gateway in partnership with local telco Trans Ocean Network (TON). It uses racks as the datacenter carrier and fully integrates all sub-systems including UPSs, cooling, power distribution, lightning protection, fire control (optional), wiring, airflow management, intelligent. The premier provider of advanced Server Building Block Solutions® for 5G/Edge, Data Center, Cloud, Enterprise, Big Data, HPC and Embedded markets worldwide. We create Prefabricated Micro Data Center to build foundation of digital future. Fully integration with smart monitoring, low PUE cooling technologies, high reliability power supplies, full method access control and security.
