

Patch Cord Fiber Optic SC-FC Self-operated

AI Overview

An SC-FC fiber optic patch cord is a high-performance cable with SC and FC connectors, suitable for singlemode or multimode networks, offering reliable, low-loss optical transmission.

Overview An SC-FC fiber optic patch cord is a type of fiber optic jumper cable terminated with an SC connector on one end and an FC connector on the other. It is commonly used to connect equipment in fiber optic networks, enabling fast, plug-and-play connections without splicing. These patch cords are available in singlemode (typically 9/125 μm core) for long-distance, high-bandwidth applications, and multimode for LAN or campus networks.

Key Features

- Low Insertion Loss and High Return Loss:** Ensures stable and reliable signal transmission with minimal signal degradation.
- Connector Types:** SC (Subscriber Connector) and FC (Ferrule Connector) are standard; other options include LC, ST, and E2000.
- Polishing Options:** PC, UPC, or APC polishing methods are available depending on the required optical return loss performance.
- Durable Construction:** Typically made with PVC jackets for flexibility and protection, resistant to bending, deformation, and wear.
- Flexible Installation:** Suitable for indoor setups, including walls, ceilings, conduits, and FTTH networks.

Applications

- Telecom and Enterprise Networks:** Connect switches, routers, and optical transceivers.
- FTTH (Fiber to the Home):** Ideal for connecting optical network terminals.
- CATV and Instrumentation:** APC versions reduce back reflections for sensitive equipment.
- Data Centers and LANs:** Quick and reliable interconnections for high-speed networks.

Specifications

- Cable Lengths:** Commonly 1m, 2m, 3m, 5m, or custom lengths.
- Fiber Mode:** Singlemode (yellow jacket) or multimode (orange or aqua jacket).
- Core Size:** Singlemode 9 μm , multimode 50/125 μm or 62.5/125 μm .
- Warranty:** Many suppliers offer 1-2 years warranty for fiber components.
