

Plastic cable trays in the distribution box

Overview

Plastic installation cable trays are specifically designed to ensure the safe and orderly installation of electrical cables, wires, and other installation elements. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. Find options for under desk, wall-mounted, and server rack setups. This expansion is primarily fueled by escalating demand from the telecommunications, data center, and renewable energy sectors. Designed for in-situ cutting, these lightweight cable management trays are a cost effective yet robust PVC alternative to traditional metal. Safe to cut with standard tools, they can be trimmed to custom lengths in moments.
